

ONELAN Control Apps

UI Apps for content control
within Digital signage

ONELAN has developed replacement UI pages that work with ONELAN API to provide non-technical users simple, yet powerful control over their content. Enhance standard circular playlists on the ONELAN signage player with advanced playback control.

Schedule control

Override default schedules, changing screen layouts from a single button press

On demand content

Trigger specific content within any zone from a single button press

Network control

Simply target one player or unlimited players to control content across the network

Video wall control

Control multiple screens in multi-player video wall configurations

TV channel control

Change the channel of IPTV streams within multi-zoned signage

Time counter

Countdown timers for product launches, special events, break/lunch times. Create countup timers, such as 'Time since last incident' counters

Andersen House, Newtown Road, Henley-on-Thames, RG9 1HG, UK
