

ONELAN

4K Video Wall Solutions

The ONELAN Video Wall solution is a simple, cost effective communication solution designed to create a high impact visual experience in stunning detail with Ultra High 4K definition.

Communicate your organisation's messages, brand values, live TV and promotional videos, as well as dynamic real time information to provide your staff and visitors a creative, engaging and informative experience. Applications for these video walls include:

Public space advertising and hospitality

- ◆ VIP Lounges
- ◆ Restaurants and bars
- ◆ Airports and train stations
- ◆ Retail/shopping centres

Corporate and employee communication

- ◆ Call Centres
- ◆ Financial - stocks and shares
- ◆ Corporate breakout areas

Media playback

*Not all content types are supported on all players. Please check player datasheets for more details

How it works?

There are two approaches to creating a video wall using the ONELAN Net-Top-Box (NTB). Firstly using the displays' built in loopthrough capability or by using a single 4K NTB and a video wall controller from our partners, Datapath.

Advanced video walls using Datapath

Advantages of a ONELAN and Datapath solution

- ◆ Easily handle multizone layouts
- ◆ Capable of handling text scrolling across multiple displays
- ◆ Creative layouts and mixed orientations
- ◆ No need to separately slice video and images
