## Subscription Based NTBs

ONELAN's subscription based licensing option can be applied to a range of NTBs from single zone HD players to our top-of-the-range 4K unlimited zone player.

Available in CMS 3.5 onwards, subscription based signage players lower the initial cost of investment and enables customers to assign on-going costs to their operational expenditure budgets thereby offering businesses of every size an extra competitive advantage. This gives advertising and retail networks in particular greater scope to align overhead costs with revenue generation.

**Available on:**

- NEW NTB-HDN-RTL1F**  
Single zone, compact HD player
- NEW NTB-HDN-10F**  
Multi-zone, compact HD player
- NTB-4K-1000F**  
Unlimited zones, 4K player

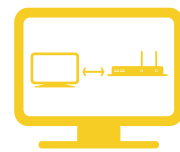

### Low Upfront Costs

By introducing a recurring license model, customers will have a far lower capital outlay and able to spread the cost of their digital signage over several years.

### Flexible License Terms

With one, three, or five year licenses available, the subscription based NTBs provide the flexibility for any sized company to grow.

### Manageable with CMS

As with all ONELAN players, licenses can be managed through the CMS including the ability to transfer licenses between NTBs and SoC players.
